A PROPOSAL FOR APSRTC

AP TransitOS

One connected platform for citizens, buses, crews, depots and government. Cashless, live and in Telugu.

Citizen app | Driver app | Conductor scanner | Depot operations | Government command center | Admin console

Every screen in this document is a real screen from the working system, captured on Kurnool pilot data, October 2026.

CONTENTS

What this document covers

1 **The problem and the idea**
APSRTC today, and one platform for everyone

2 **The product, portal by portal**
Citizen, driver, conductor, depot, government and admin screens

3 **Benefits**
For citizens, crews, depots, APSRTC and government

4 **Cashless and less hard work**
A conductor’s shift before and after

5 **Passes and retention**
Weekly and monthly passes that keep riders

6 **Data**
Every ride becomes a record APSRTC can use

7 **Money**
Advertising income and the value of tracked revenue

8 **Scale and rollout**
Metro cities, other states, and a Kurnool pilot

THE SCALE OF APSRTC

A huge network still run on cash and paper

11,495
buses (March 2025)

35 to 48 lakh
passengers every day

₹14.5 Cr
earned every day

24 lakh
women ride free daily (Stree Shakti)

Cash at every seat. Conductors carry change, issue paper tickets and count cash after every shift.

No live picture. Citizens cannot see where the bus is; depots hear about breakdowns by phone.

Data arrives late. Demand, delays and free travel counts come from reports, not live data.

Sources: APSRTC figures (Wikipedia, March 2025; APSRTC At a Glance); Stree Shakti, PTI, Oct 2026 · 2

THE IDEA

One system, six portals, one source of truth

Citizen
Find, book, pay, track, passes

→

Driver
Start trip, live GPS, SOS

→

Conductor
Scan QR, board, manifest

→

Depot
Trips, fleet, crew, incidents

→

Government
State to single bus, live

Every scan, GPS ping, payment and complaint lands in one database. The citizen, the depot and the government see the **same live numbers**, in English and Telugu. The admin console sets fares, passes and policies for all of it.

SECTION 2

The product, portal by portal

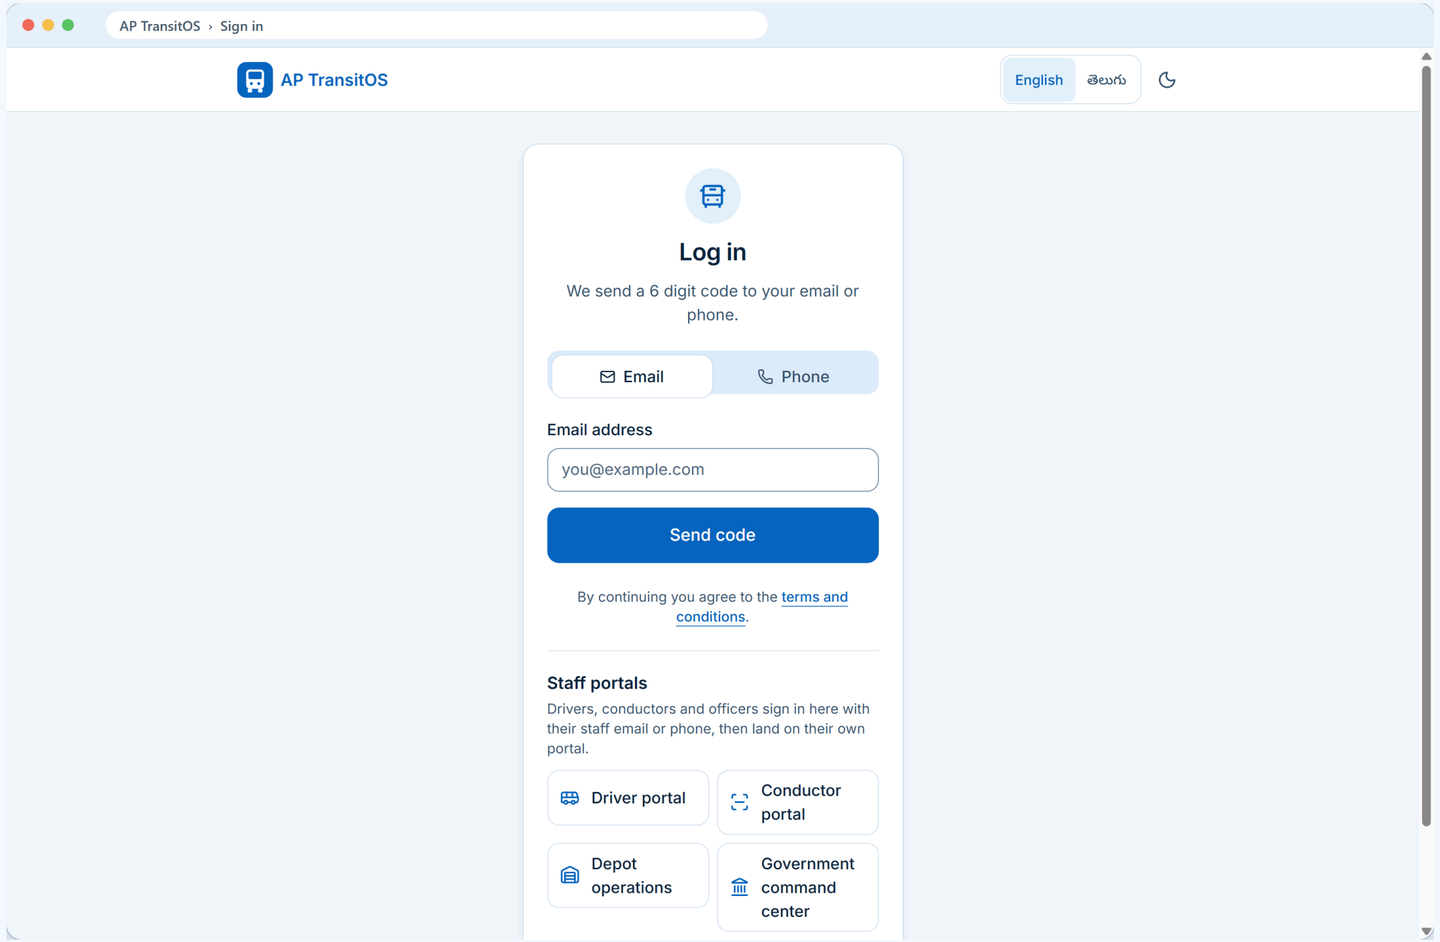

Real screens from the working system: phone apps for citizens and crews, desktop consoles for depots, government and admin.

SIGN IN

One door for everyone

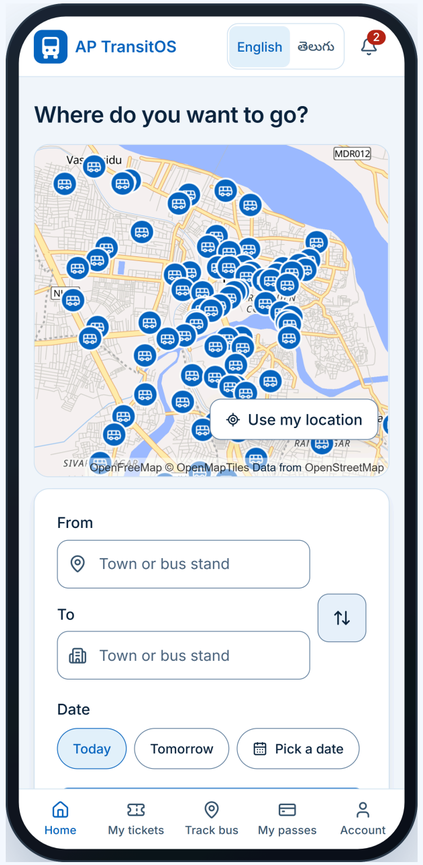

Email or phone code, or Google. Every staff portal is one tap away.

- Citizens sign in with an email or phone code, or Google
- Driver, conductor, depot, government and admin portals one tap away
- Each role sees only its own screens and area

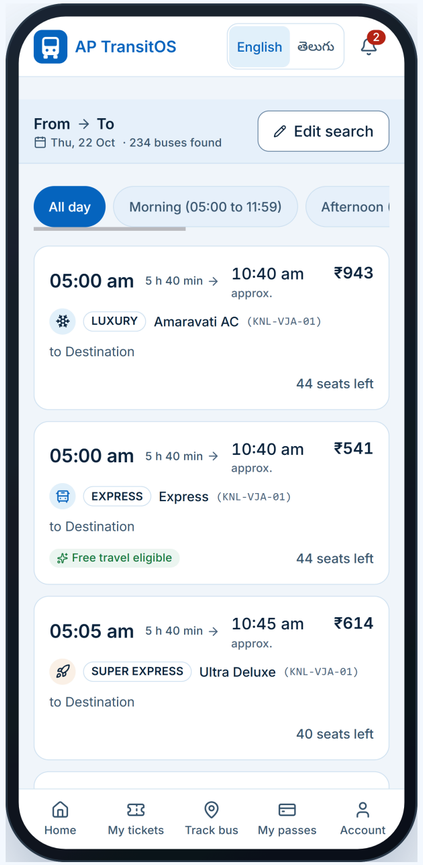

CITIZEN APP

Find a bus and book in under a minute

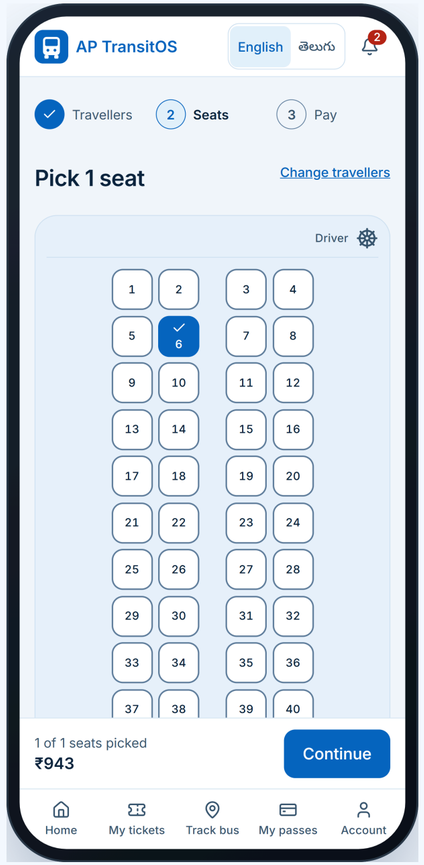

Pick From and To on a map

Every Kurnool stop, college, mall and bus stand on a live map, like a ride app.

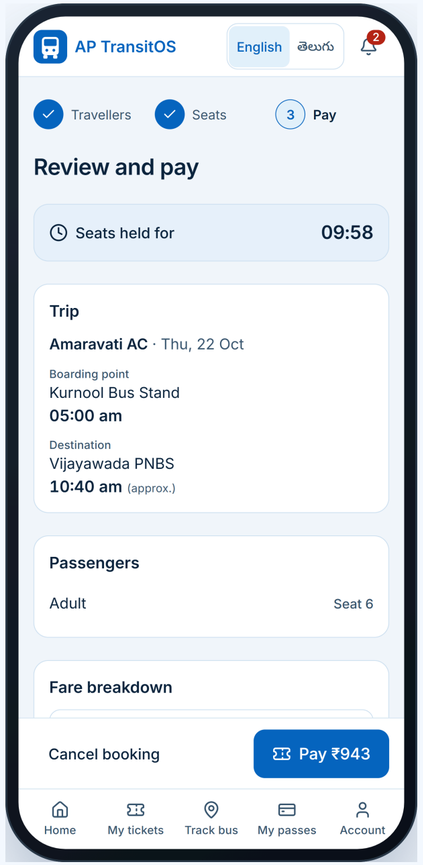

Every bus, every class

Express, Ultra Deluxe, Super Luxury and Pallevelugu with seats left and the fare.

Pick your seat

Live seat map with a 10 minute hold, so two people never get the same seat.

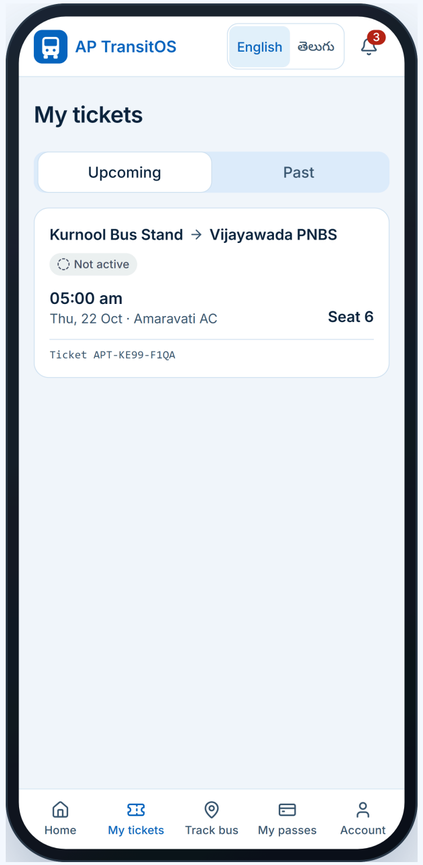

Check, then pay

Fare, seat and passenger on one screen before UPI payment.

CITIZEN APP

Tickets that cannot be faked, with space for ads

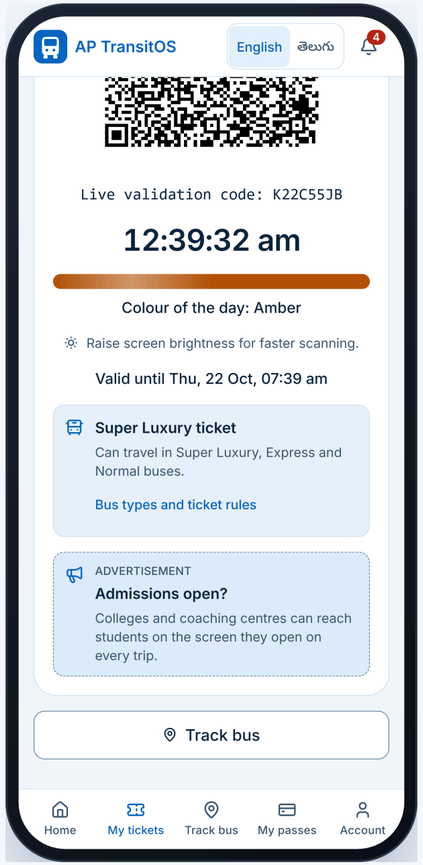

All tickets in one place

Upcoming, active and past tickets, always on the phone.

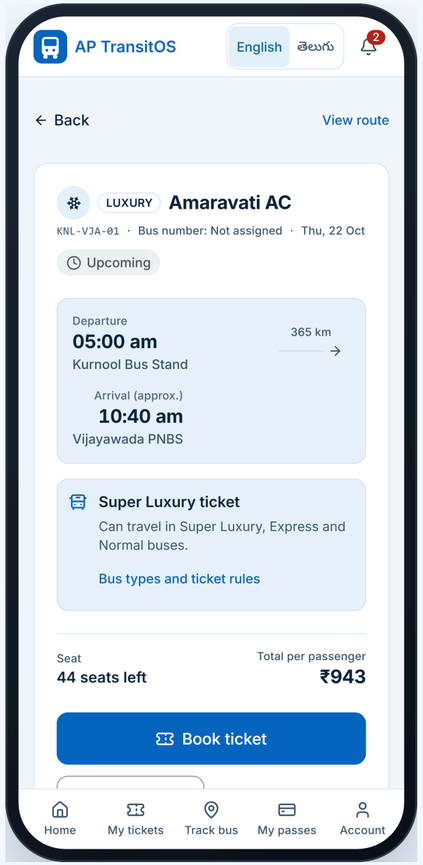

A QR that cannot be copied

The code changes every 3 seconds, so a screenshot is useless.

Ad space that pays

A labelled ad under the QR, never covering the code the conductor scans.

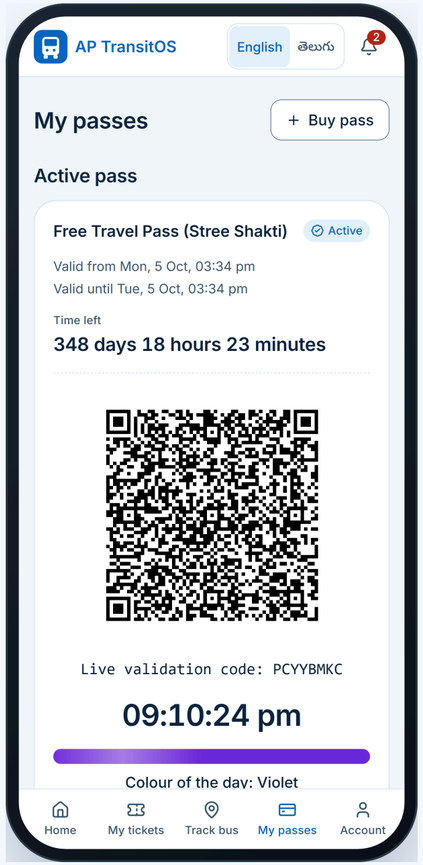

Know the bus before you board

Stops, timings, class and live seat count from the server.

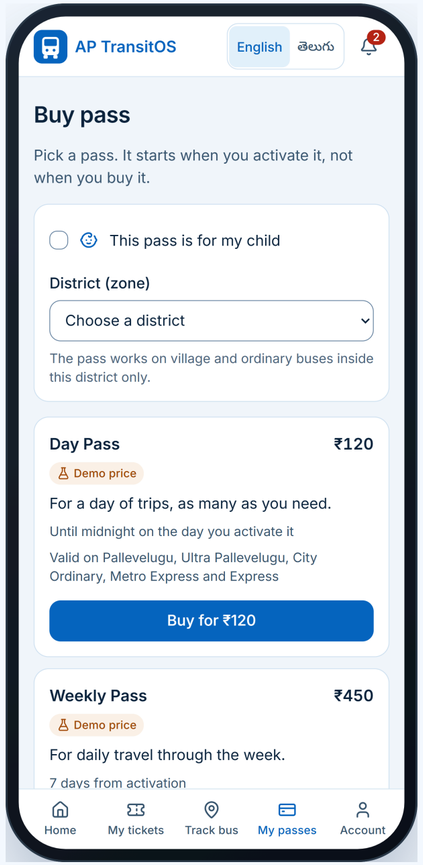

CITIZEN APP

Passes, free travel and school passes

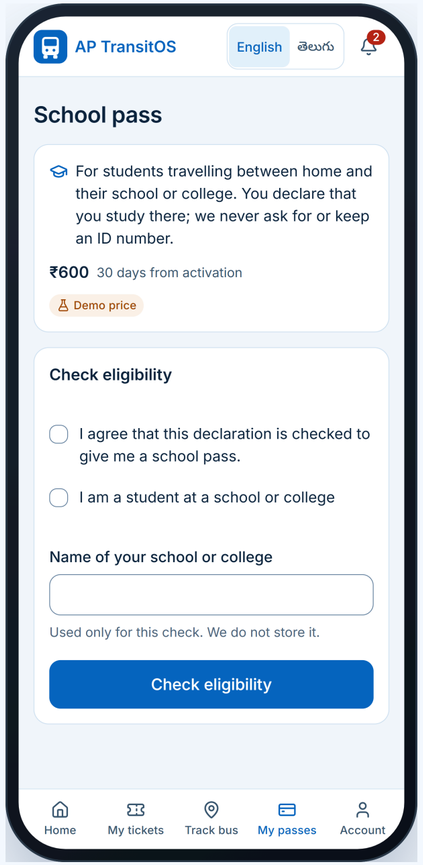

Passes with a live countdown

Daily, weekly, monthly and zone passes, renewed before they run out.

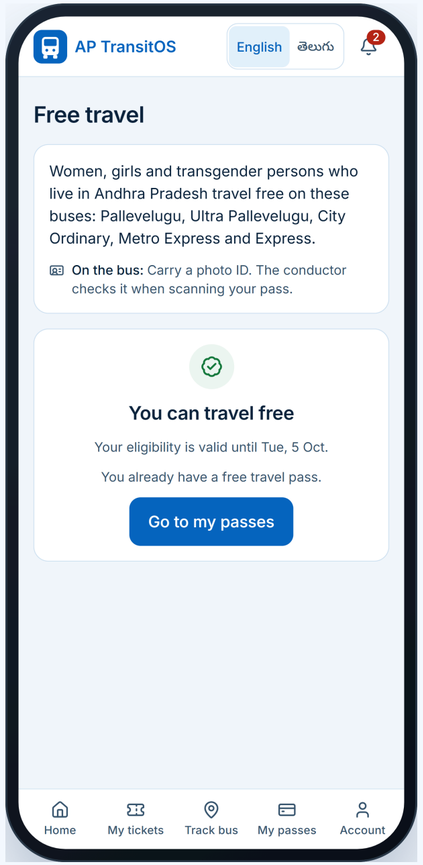

Buy a pass in two taps

Pay once, ride all week or all month. Prepaid revenue for APSRTC.

School and student passes

Route limited student passes with an eligibility check.

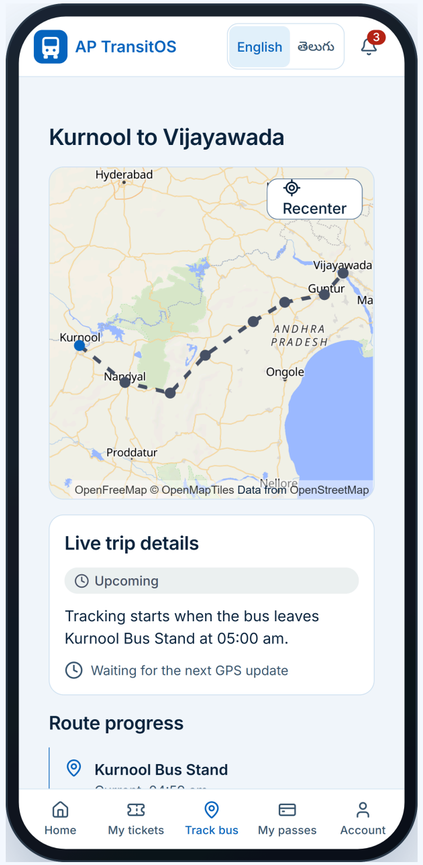

Free travel, counted

Free travel schemes get a zero fare ticket, so every ride is on record.

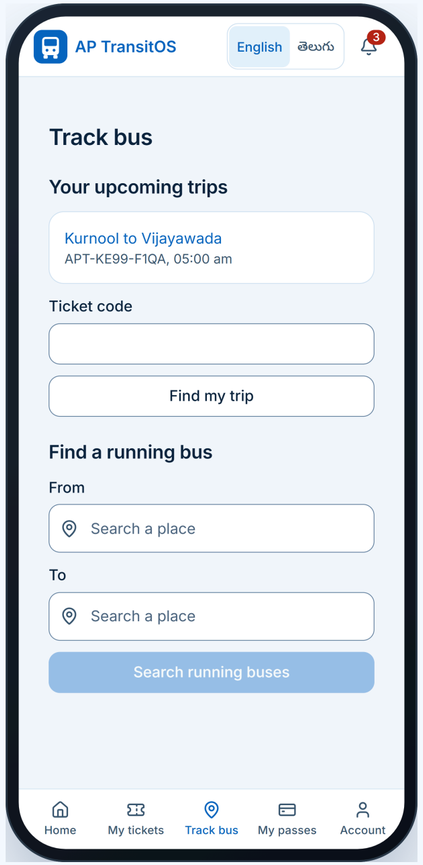

CITIZEN APP

Track the bus, get alerts, use it in Telugu

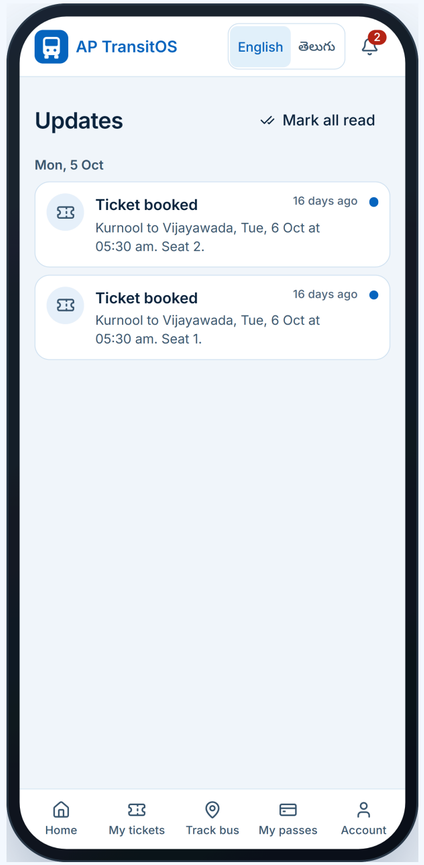

Track your trip

Route, stops and the bus position once it leaves, with delays shown.

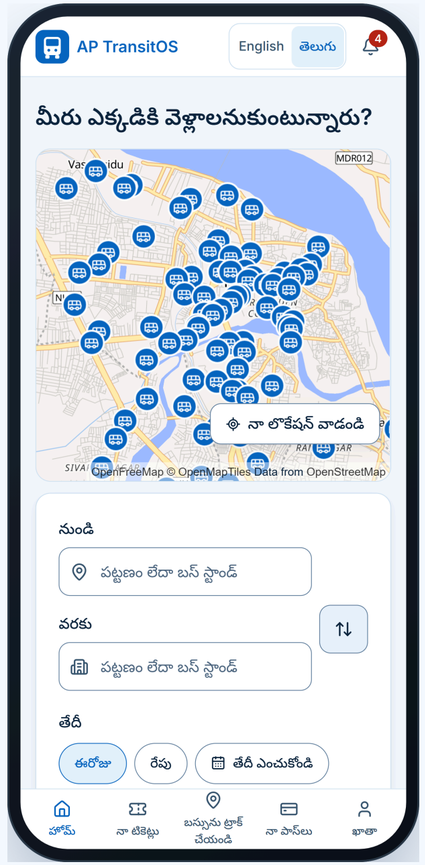

Where is my bus?

Every running bus near you with its next stop.

Updates that reach people

Delay, replacement bus and pass expiry alerts in English and Telugu.

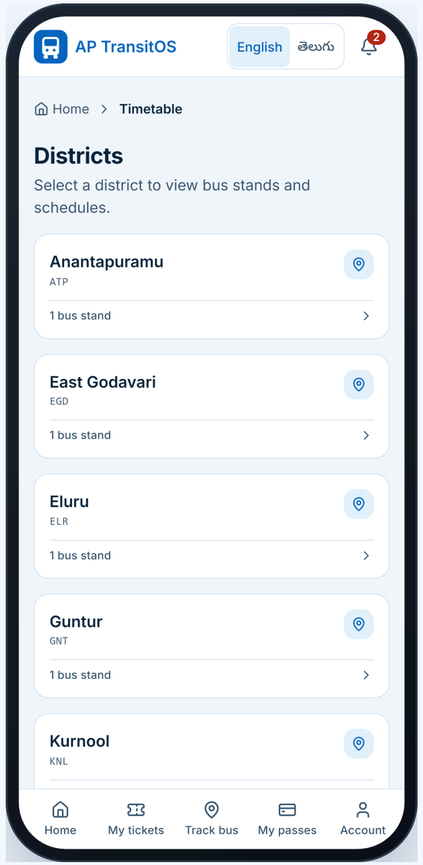

Fully in Telugu

Every screen, every message, the same data.

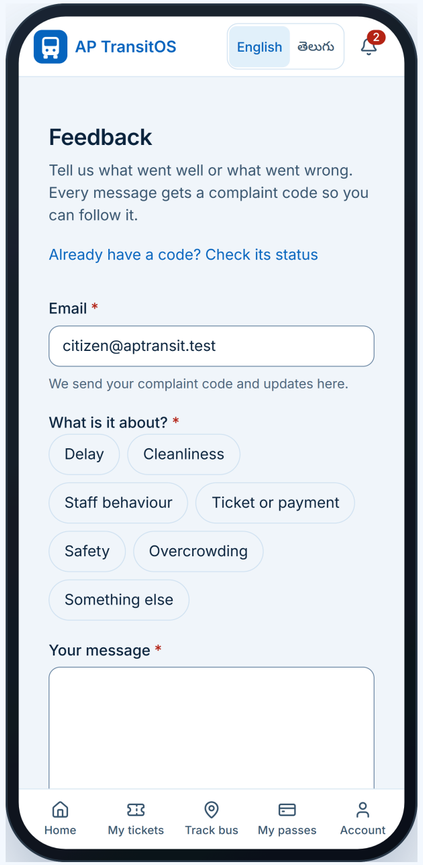

CITIZEN APP

Everything else a rider needs

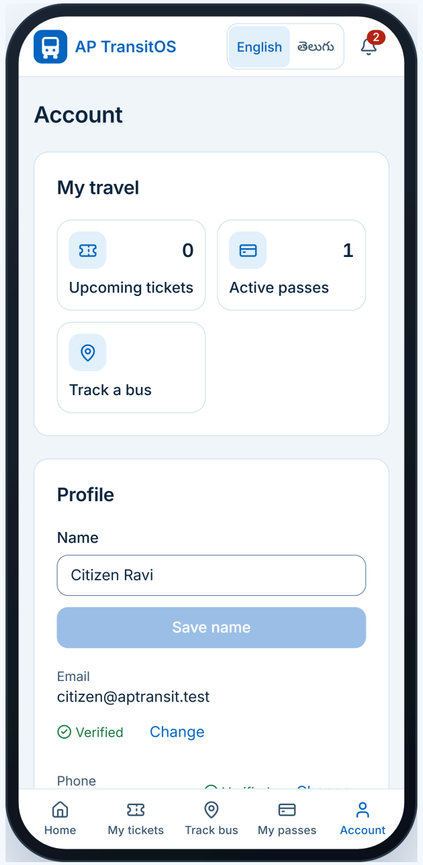

Timetables for every route

The full day's departures from any bus stand.

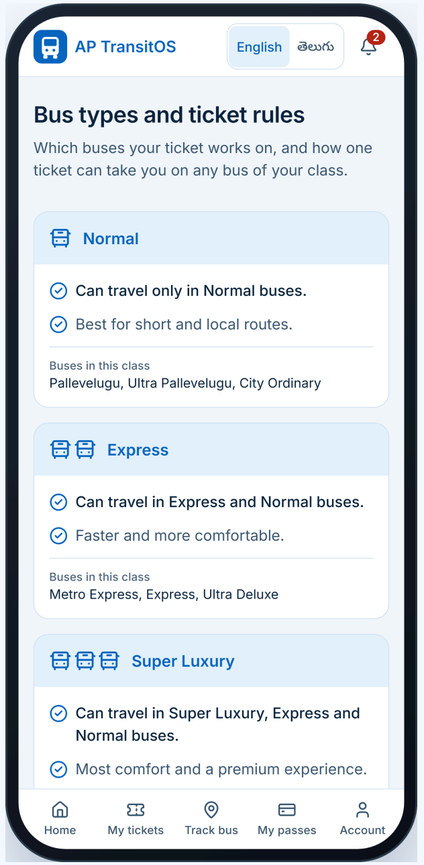

Complaints with a status

Every complaint goes to the right depot and can be tracked.

One account, many devices

Profile, saved routes, family and signed in devices.

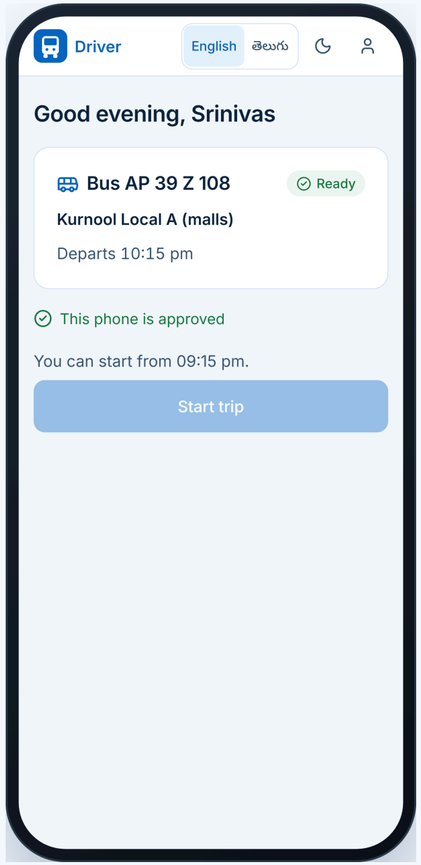

Clear rules, plainly told

Which ticket works on which bus class, in simple words.

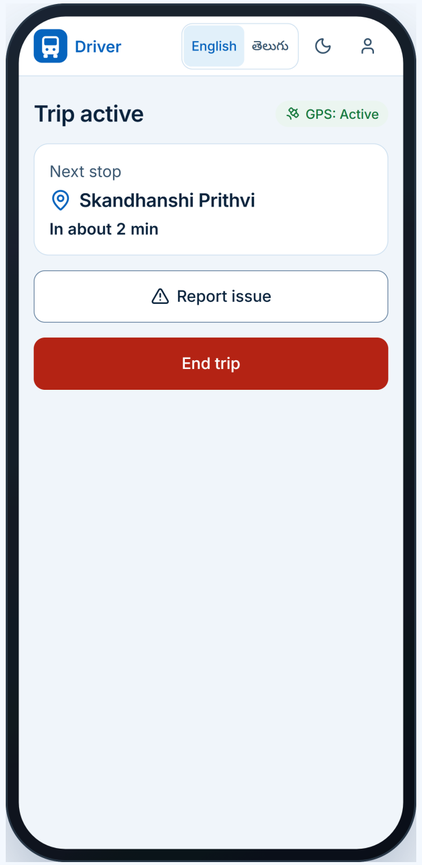

DRIVER APP

Big buttons, one job at a time

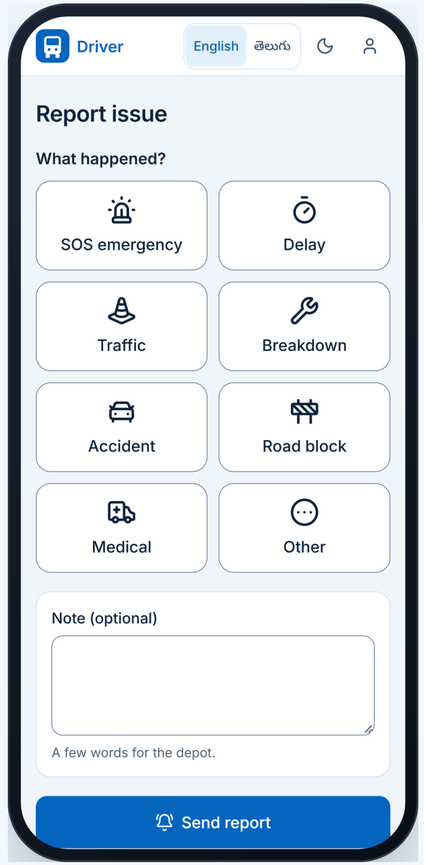

Today's duty at a glance

Big buttons, the next trip and the bus, nothing else.

Start trip, share GPS

One tap starts the trip and sends the bus position every few seconds.

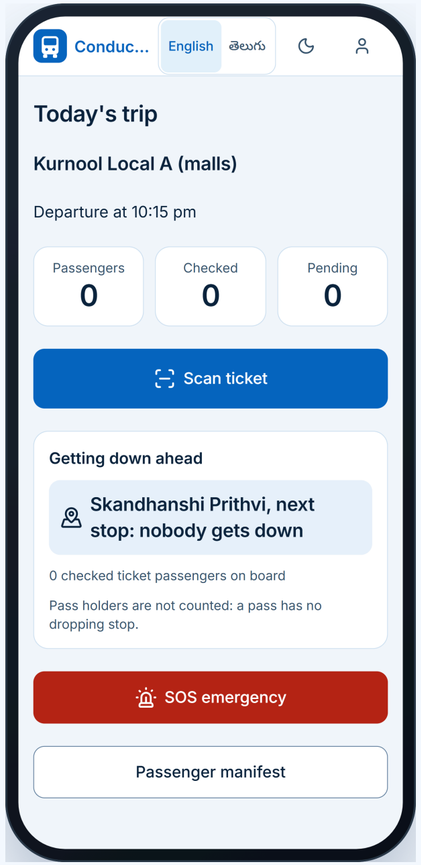

Report a problem fast

Breakdown, accident or SOS reaches the depot instantly with the location.

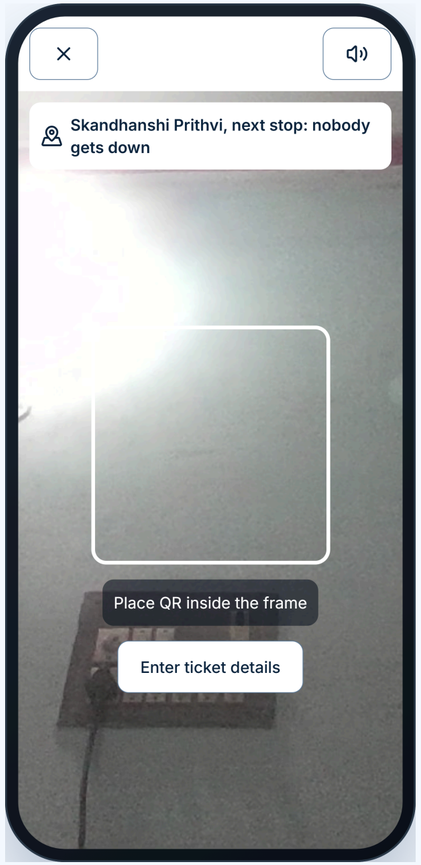

CONDUCTOR APP

Scan and board in under 2 seconds

The conductor's next trip

Passengers booked, boarded and pending, before the bus leaves.

Scan and board

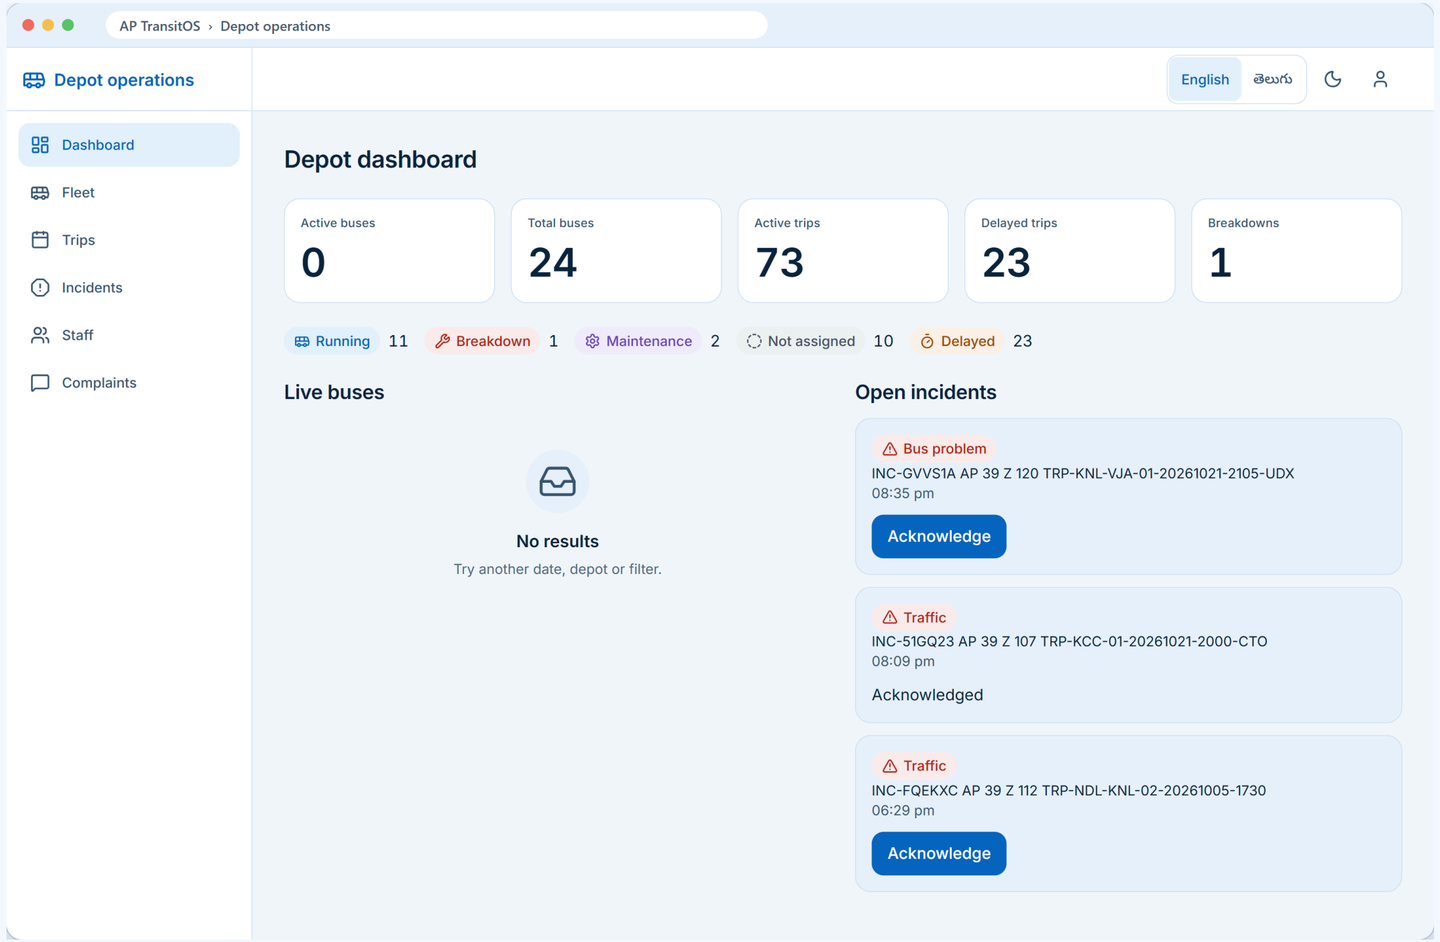

Green VALID or red ALREADY SCANNED within 2 seconds. Group tickets board at once.

DEPOT OPERATIONS

The depot in one screen

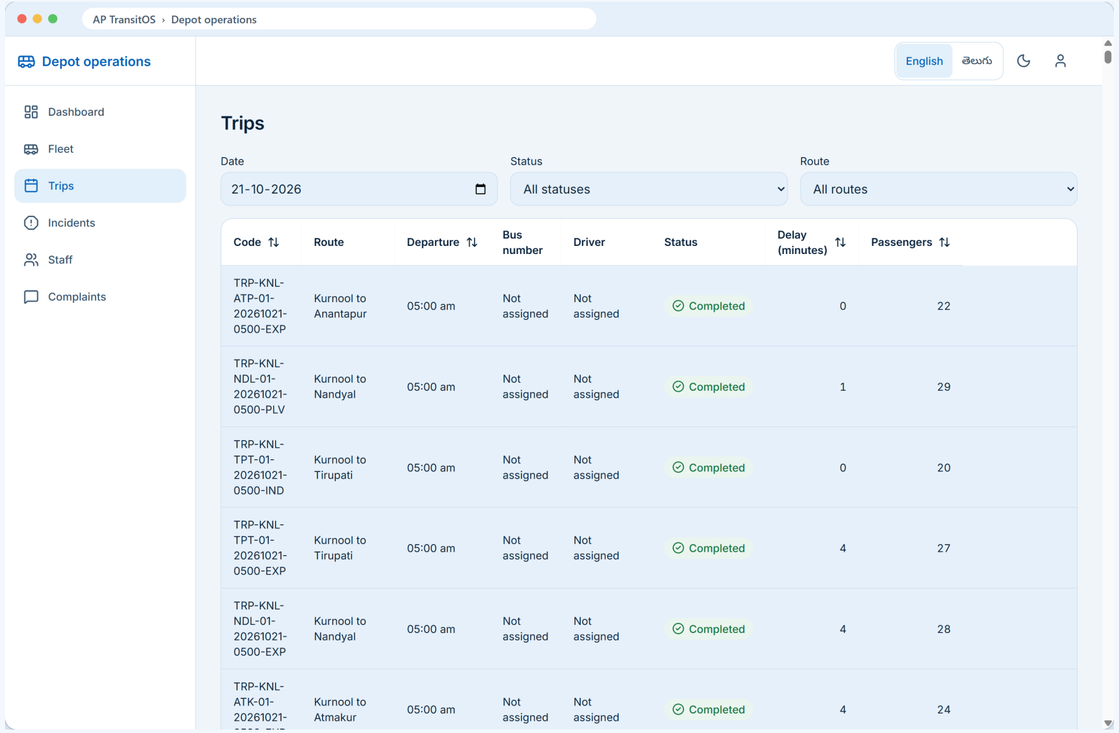

Trips running, buses free, crew on duty and open incidents.

- Live bus map and today’s trip counts
- Incidents arrive without a refresh
- Replace a broken bus in a few clicks
- Crew, fleet and complaints in one place

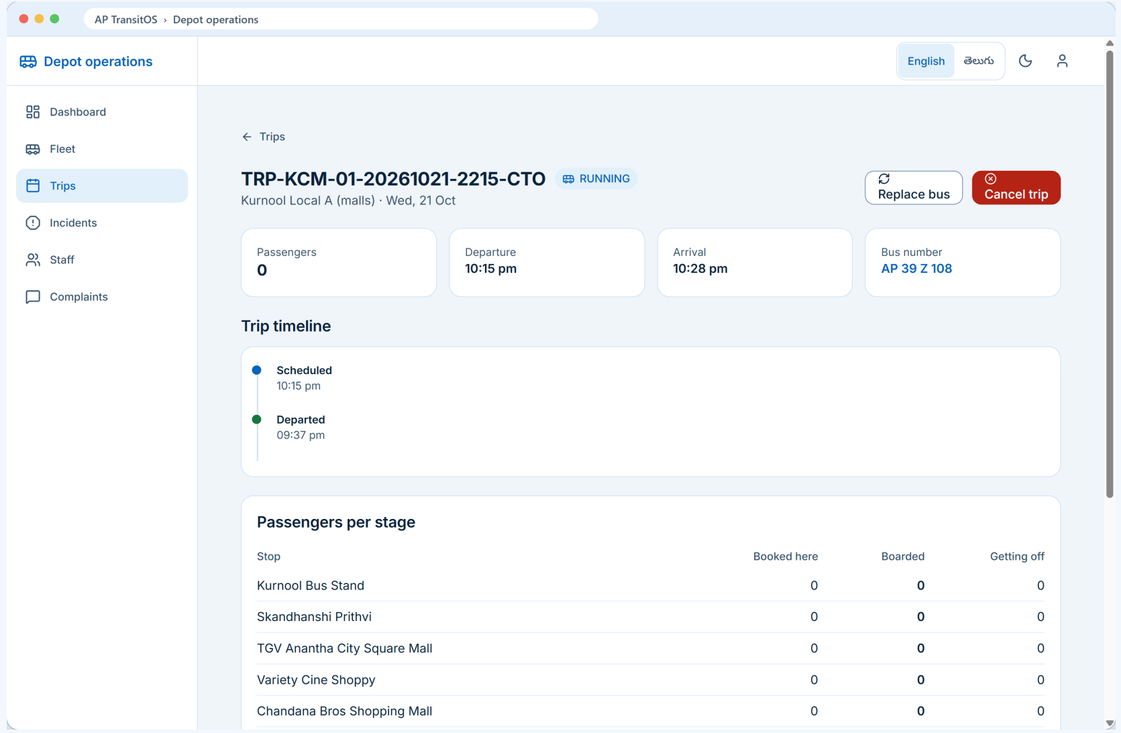

DEPOT OPERATIONS

Every trip, every bus, every crew

Every trip of the day

Scheduled, running, completed and cancelled, with live status.

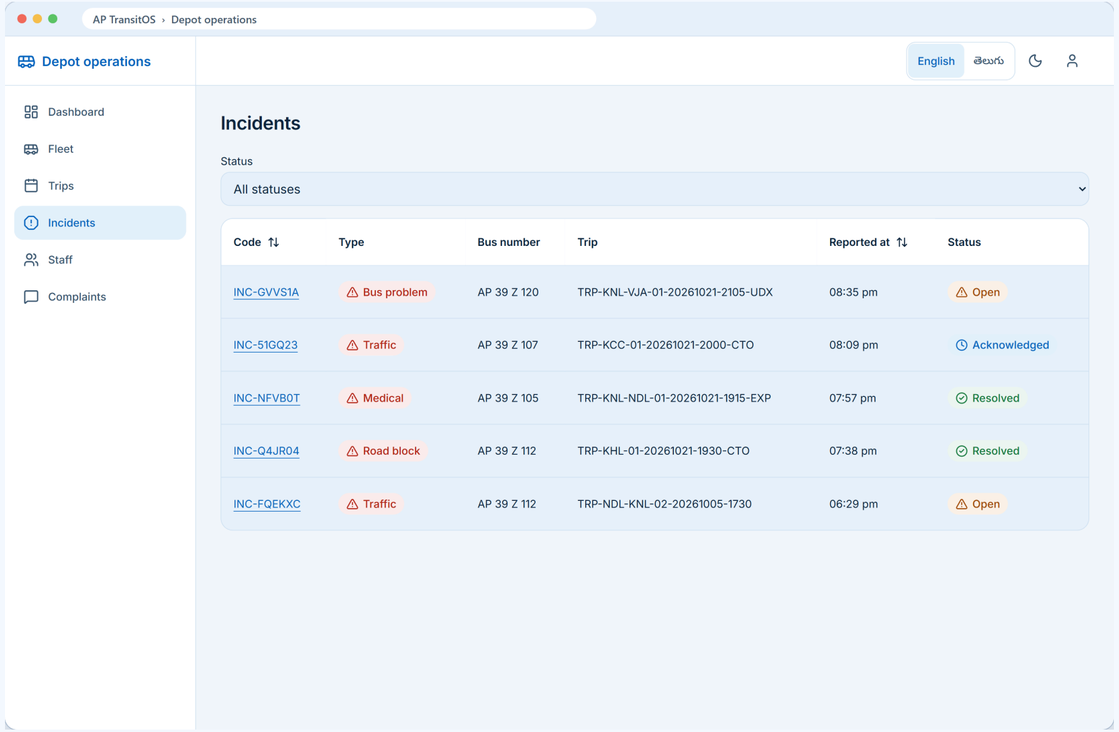

Inside a trip

Bus, crew, stage counts and position. Replace a bus in a few clicks.

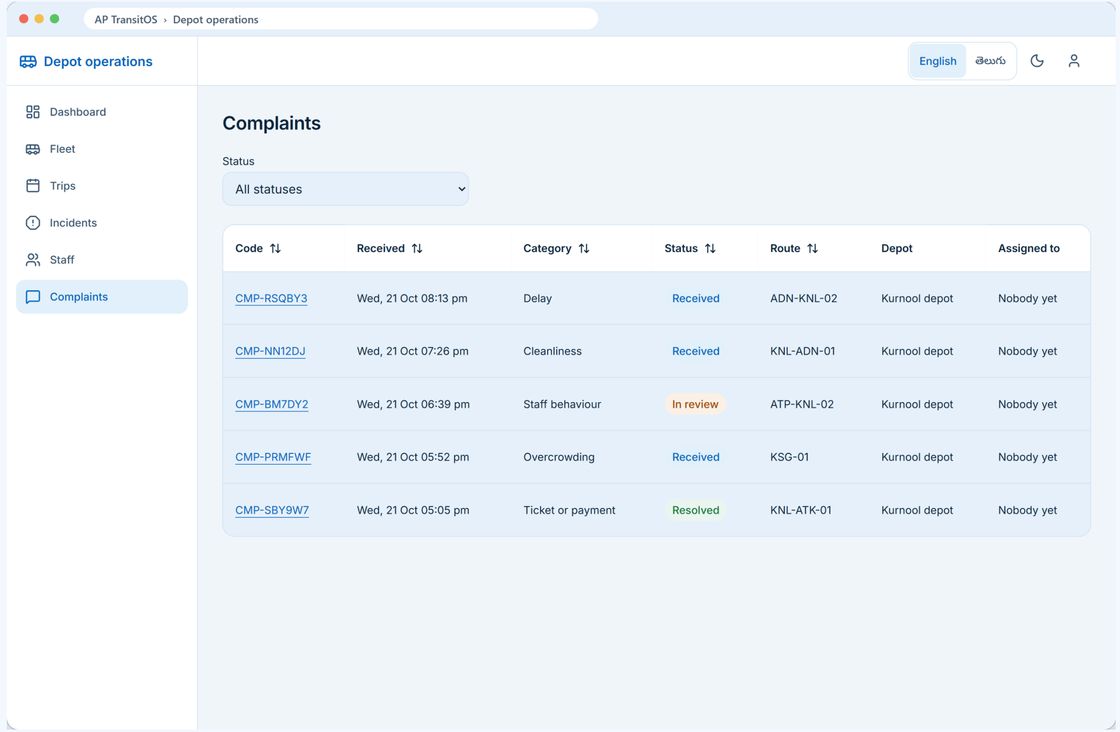

DEPOT OPERATIONS

Problems handled the same day

Incidents in real time

Breakdowns and SOS appear without a refresh.

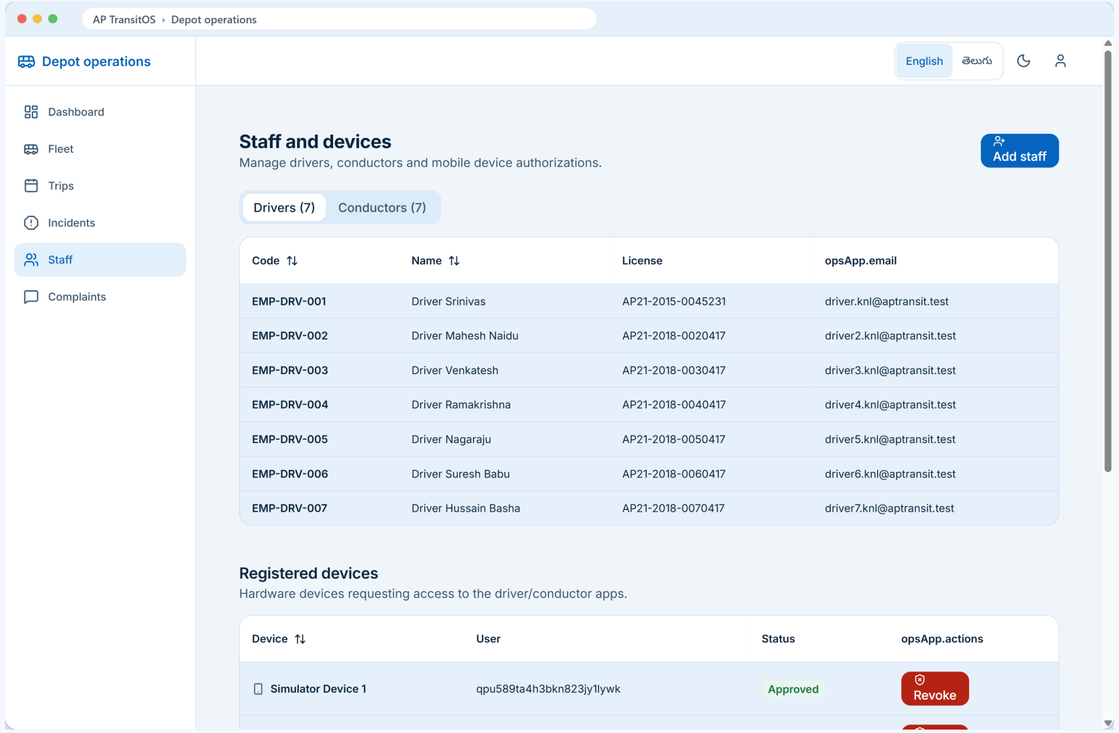

Complaints to close

Citizen complaints routed to this depot with deadlines.

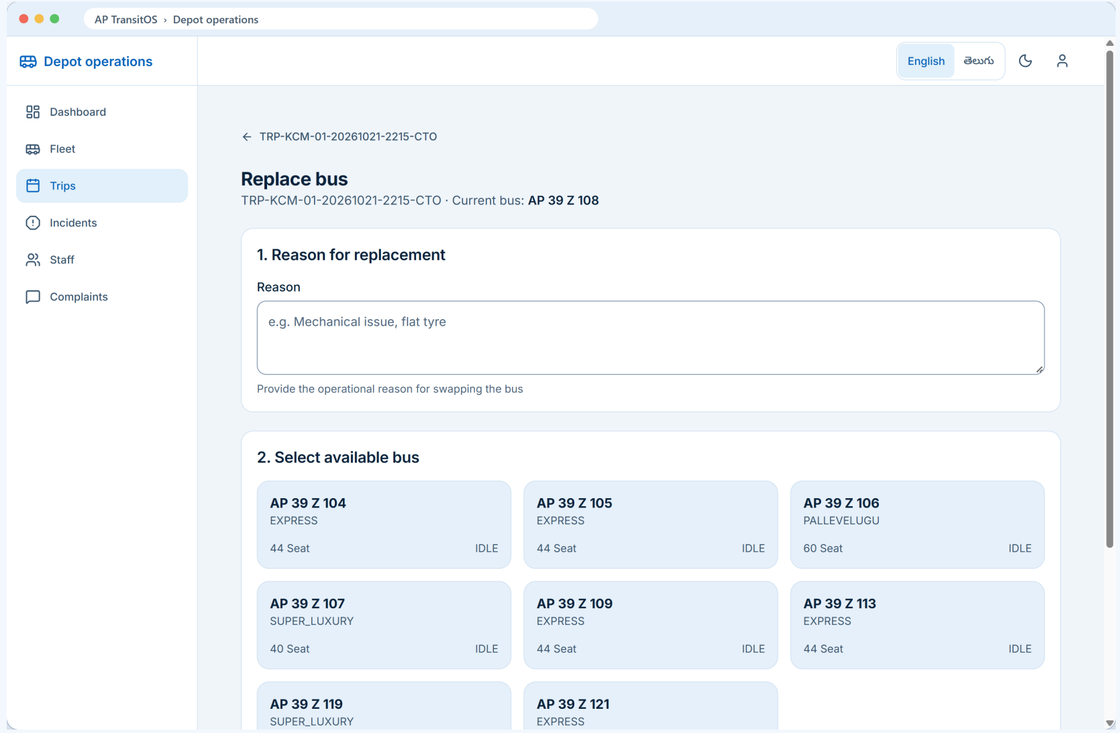

DEPOT OPERATIONS

Crew, and replacing a broken bus

Crew roster

Drivers and conductors, devices waiting for approval.

Replace a bus in minutes

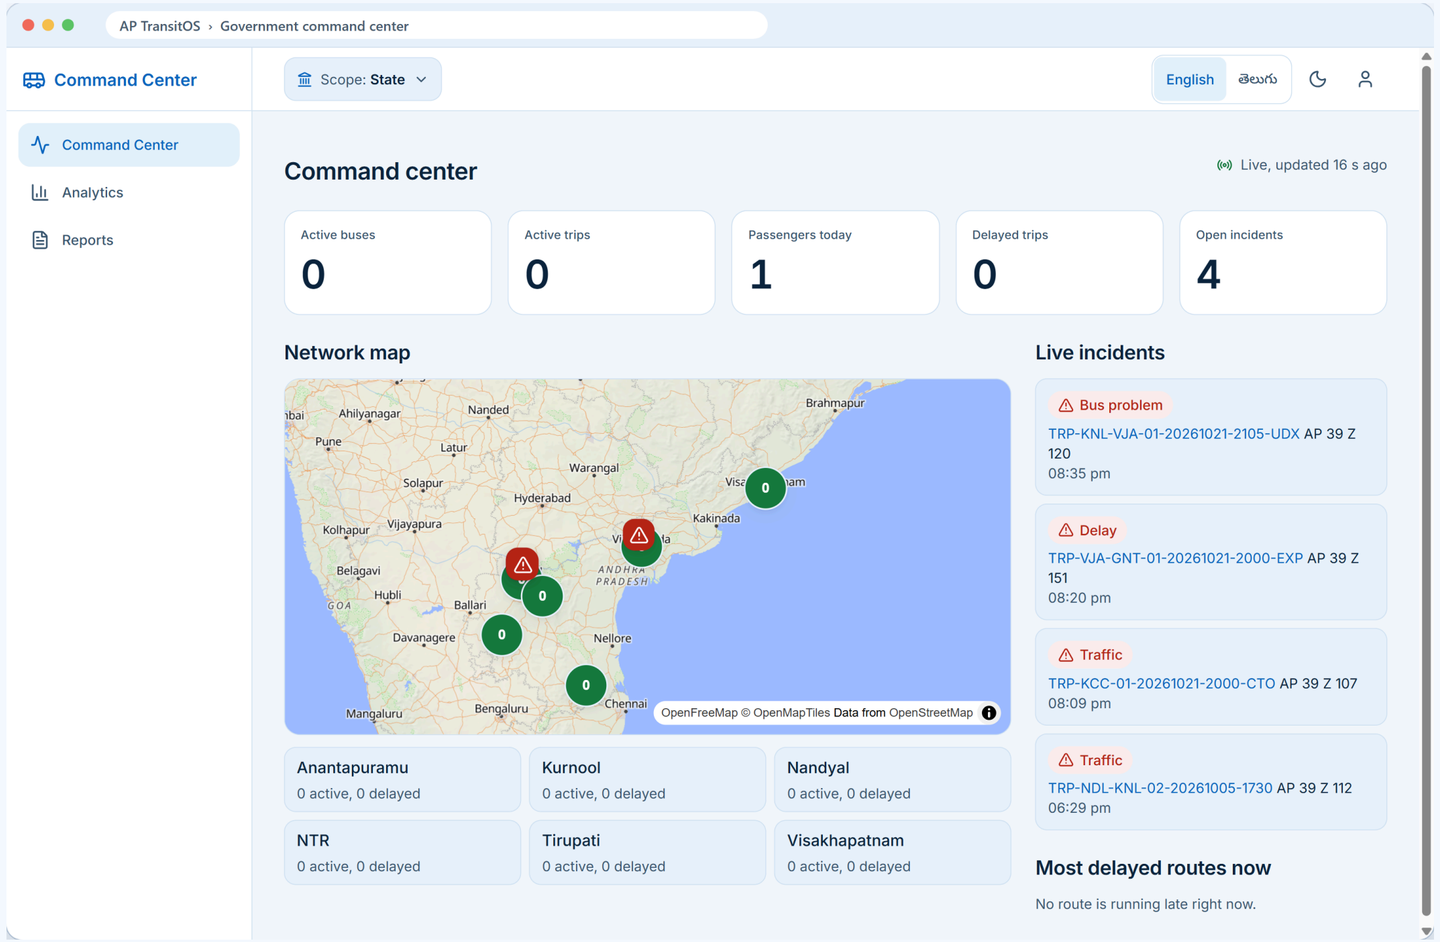

Pick a free bus; every passenger on the trip is told automatically.

GOVERNMENT COMMAND CENTER

The whole state, live

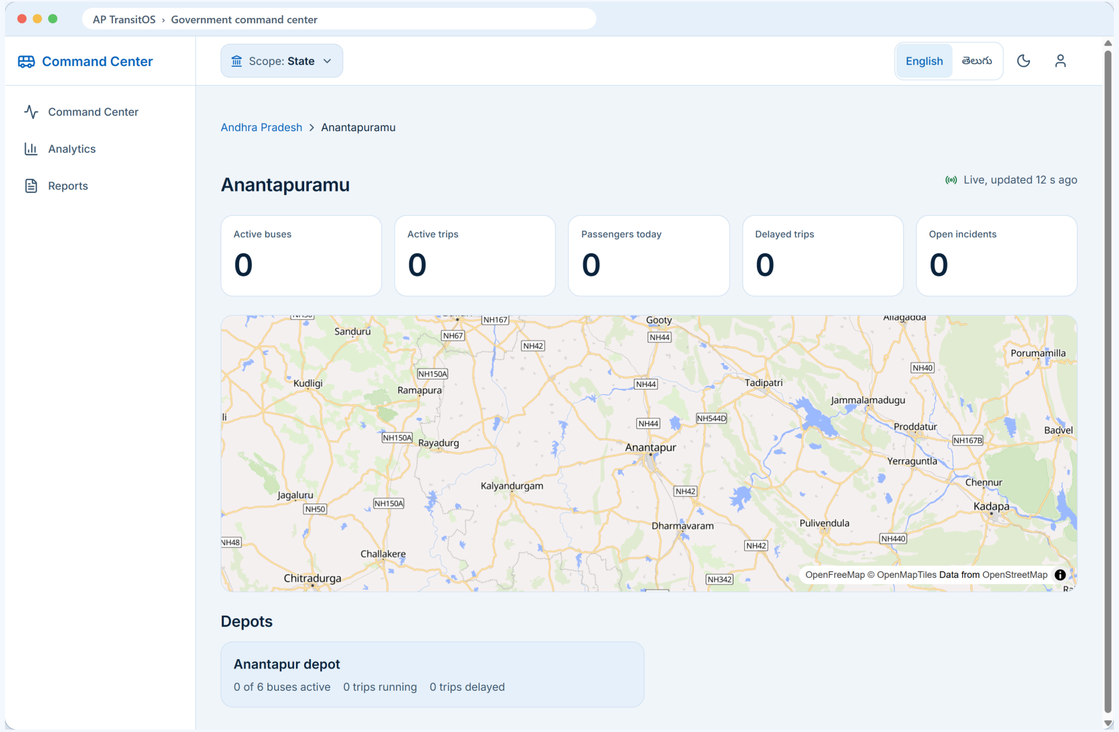

Buses running, passengers, incidents and complaints on the AP map.

- Passengers, revenue and buses running today
- Incidents and complaints on the AP map
- Drill down: state, district, depot, route, bus
- Same numbers the depots see

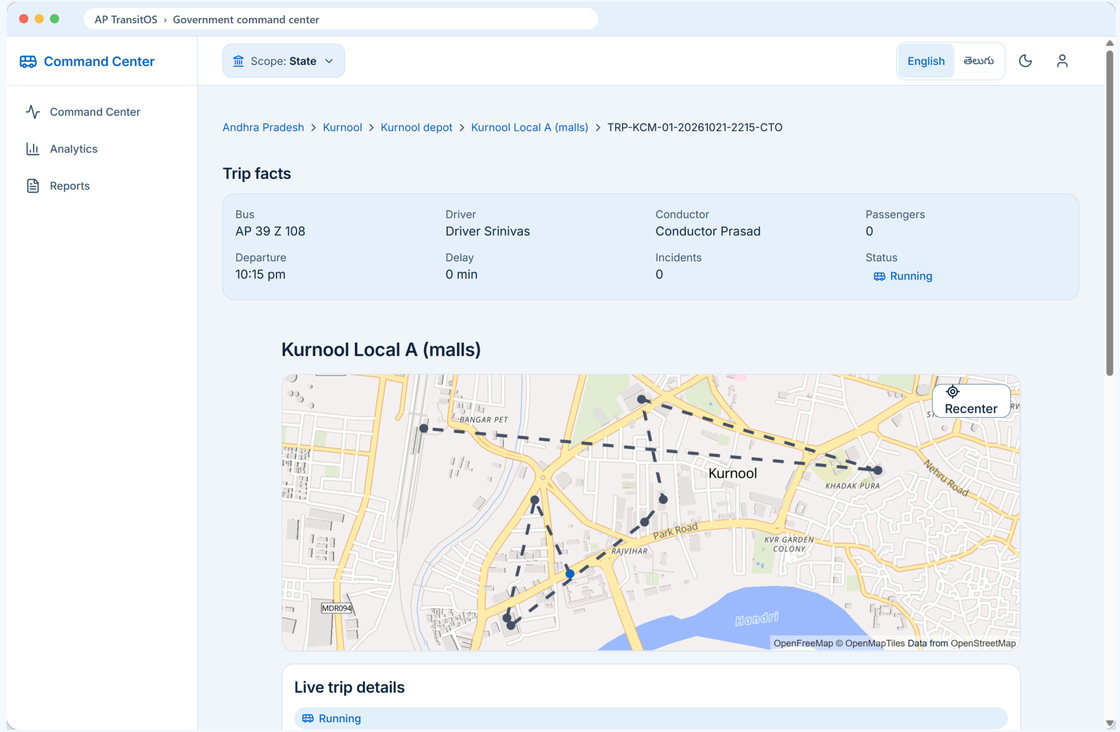

GOVERNMENT COMMAND CENTER

From the whole state to one bus

Drill down to a district

Depots, routes and performance for one district.

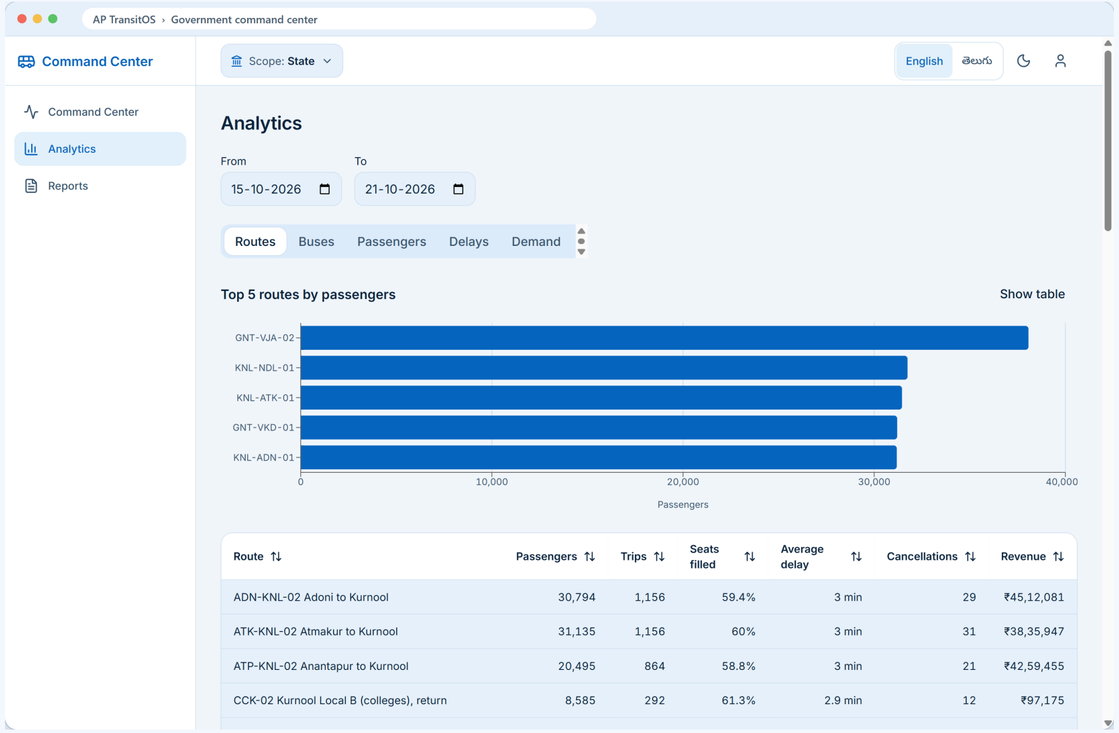

Down to a single bus

From the state view to one running trip, with its live status.

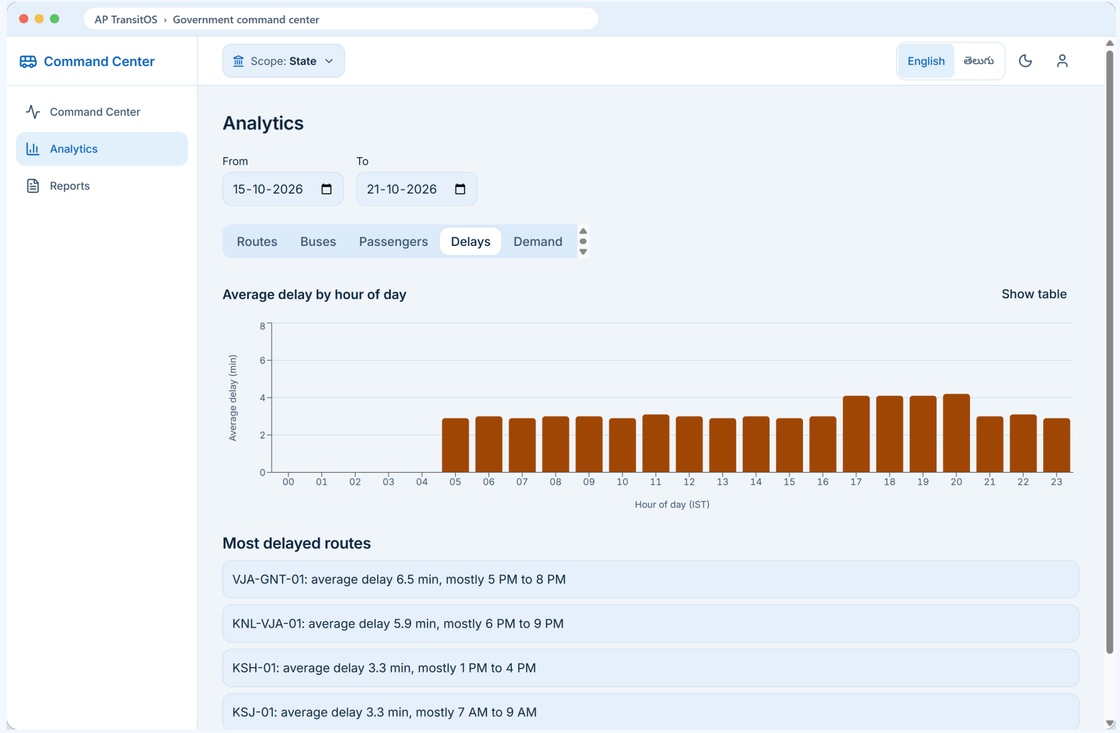

GOVERNMENT COMMAND CENTER

Analytics for planning

Demand and delays

Busy hours, route demand and delay peaks, for planning.

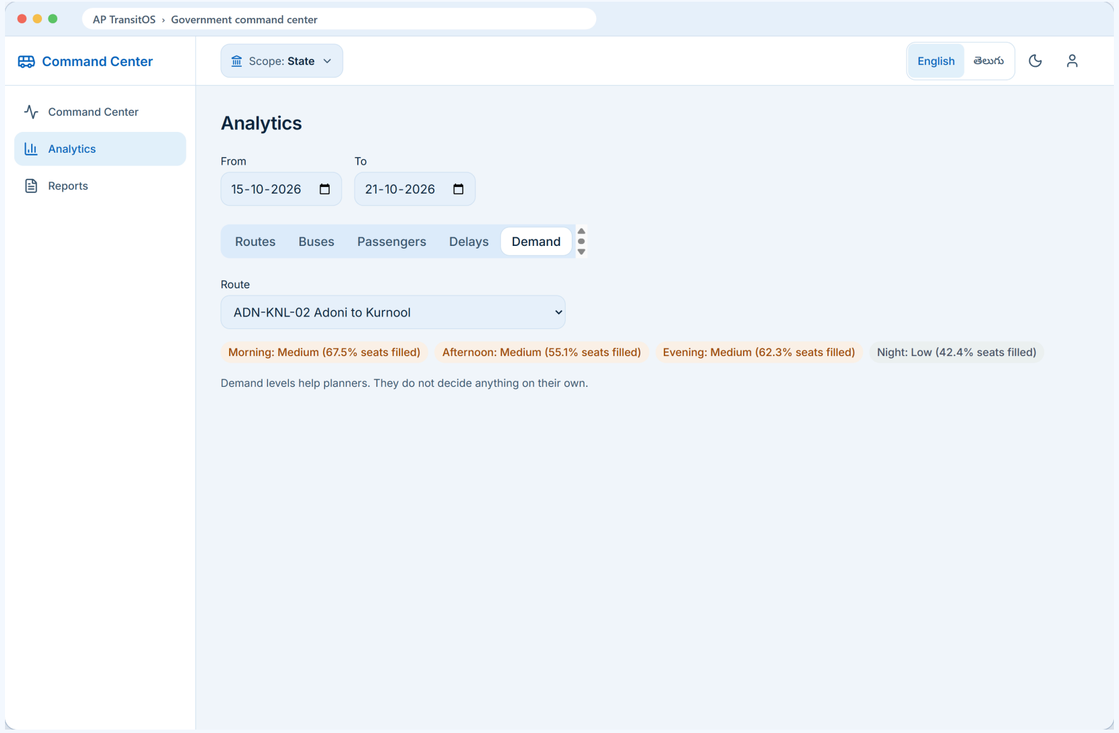

Where and when buses run late

Delay by hour of day and the most delayed routes, in plain words.

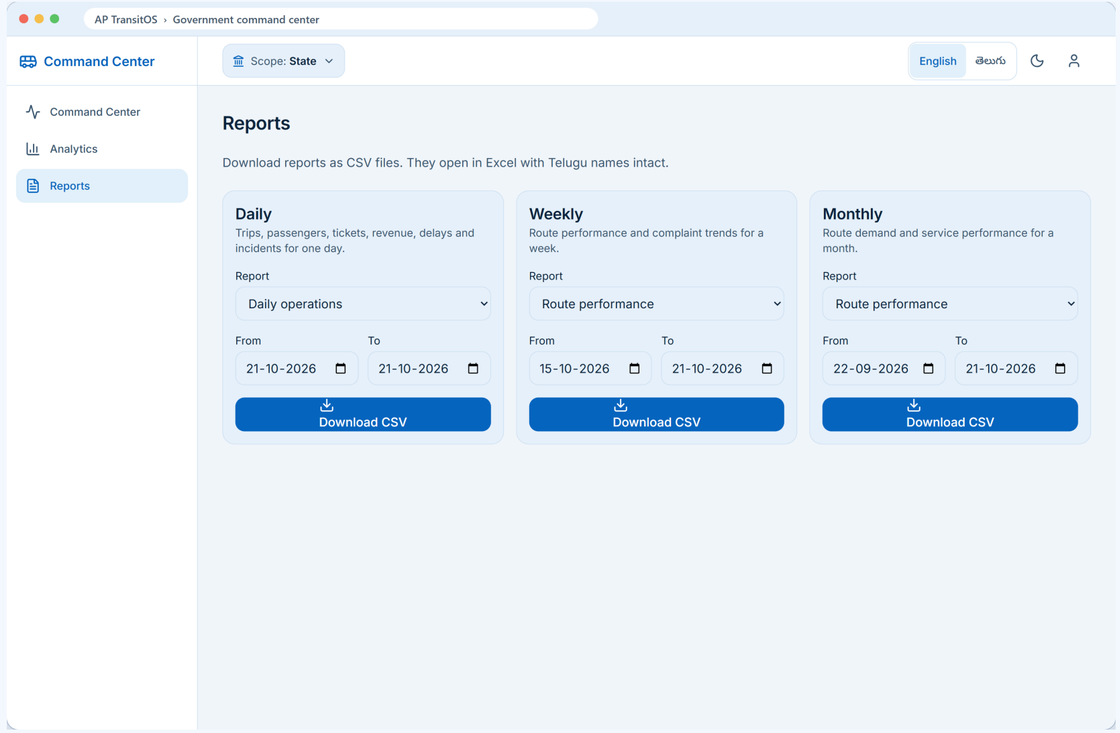

GOVERNMENT COMMAND CENTER

Demand, and reports in one click

Demand by route and hour

Plan extra buses for the hours and routes that need them.

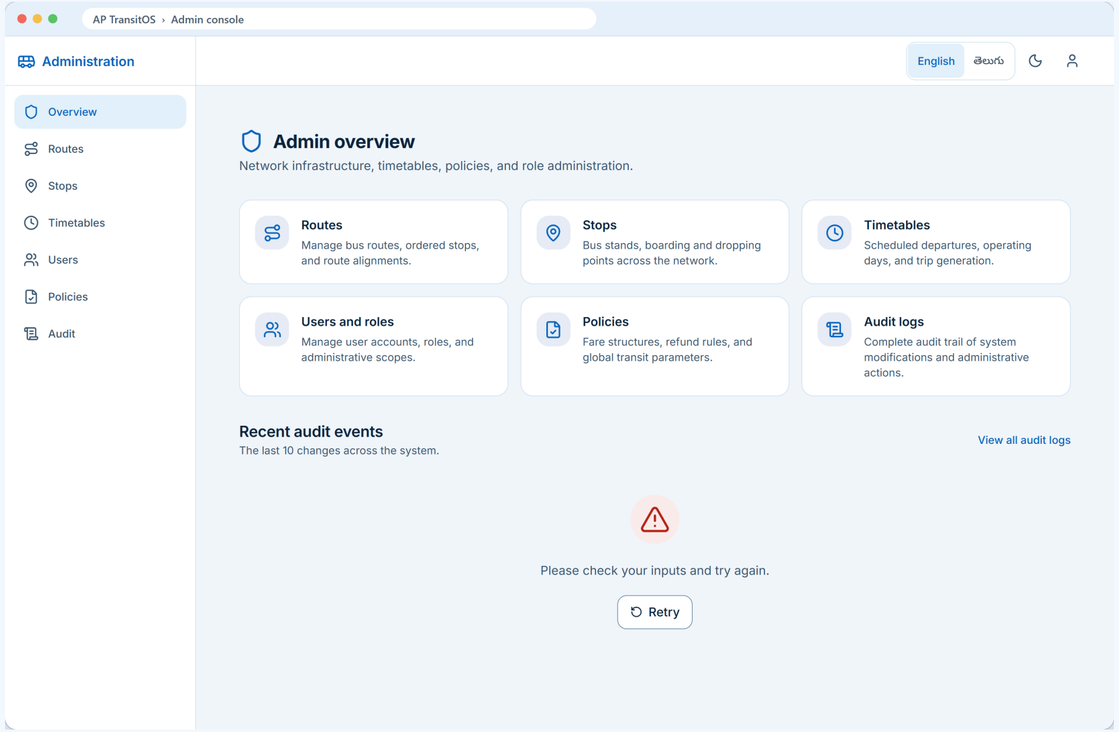

Reports in one click

CSV exports that open in Excel, with Telugu names.

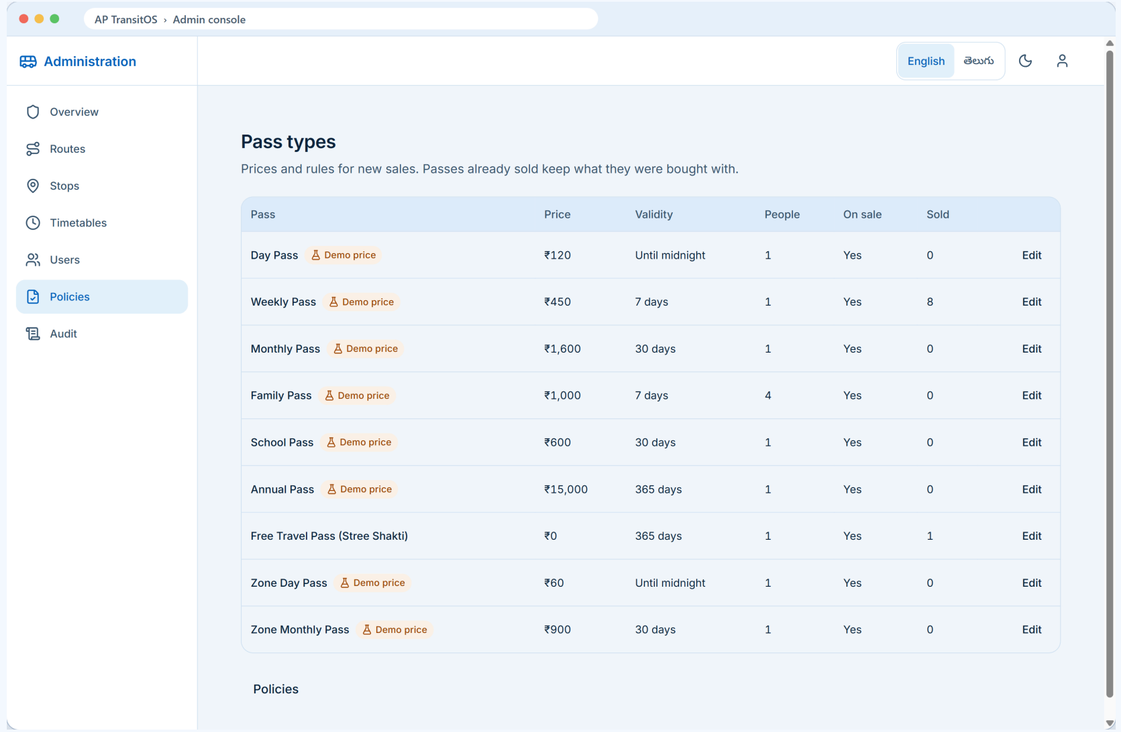

ADMIN CONSOLE

APSRTC sets the rules, no code changes

Admin console

Users, routes, stops, timetables, fares and policies.

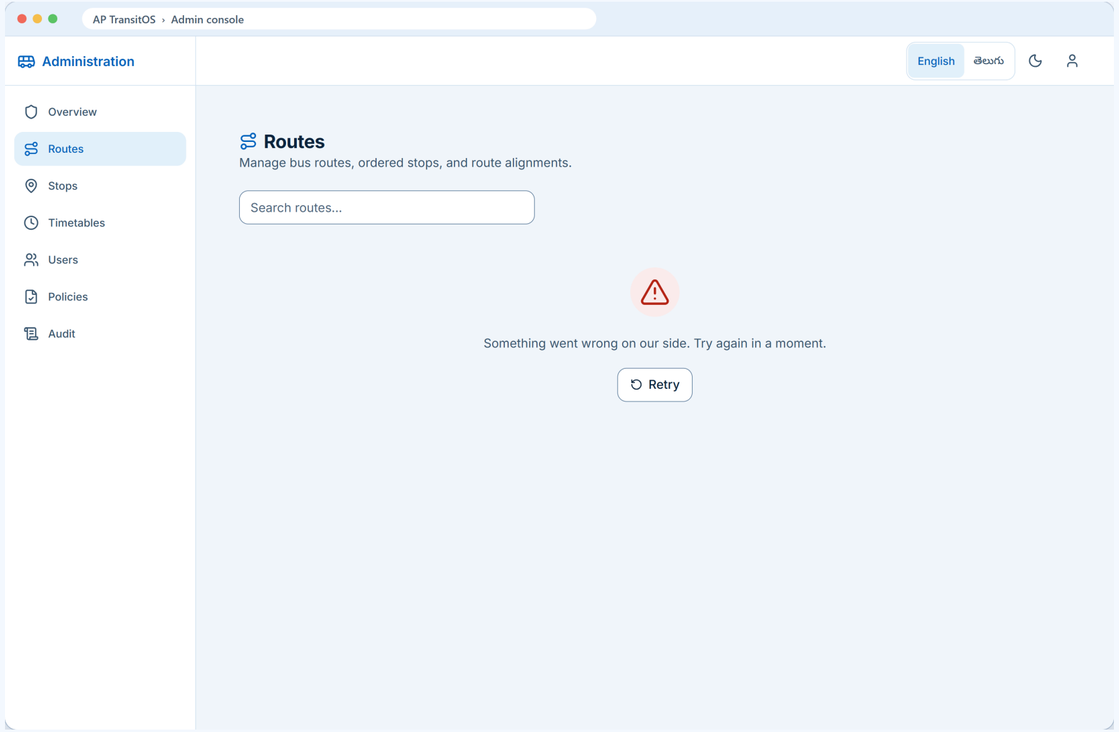

Pass catalog

Pass prices and rules, changed without touching code.

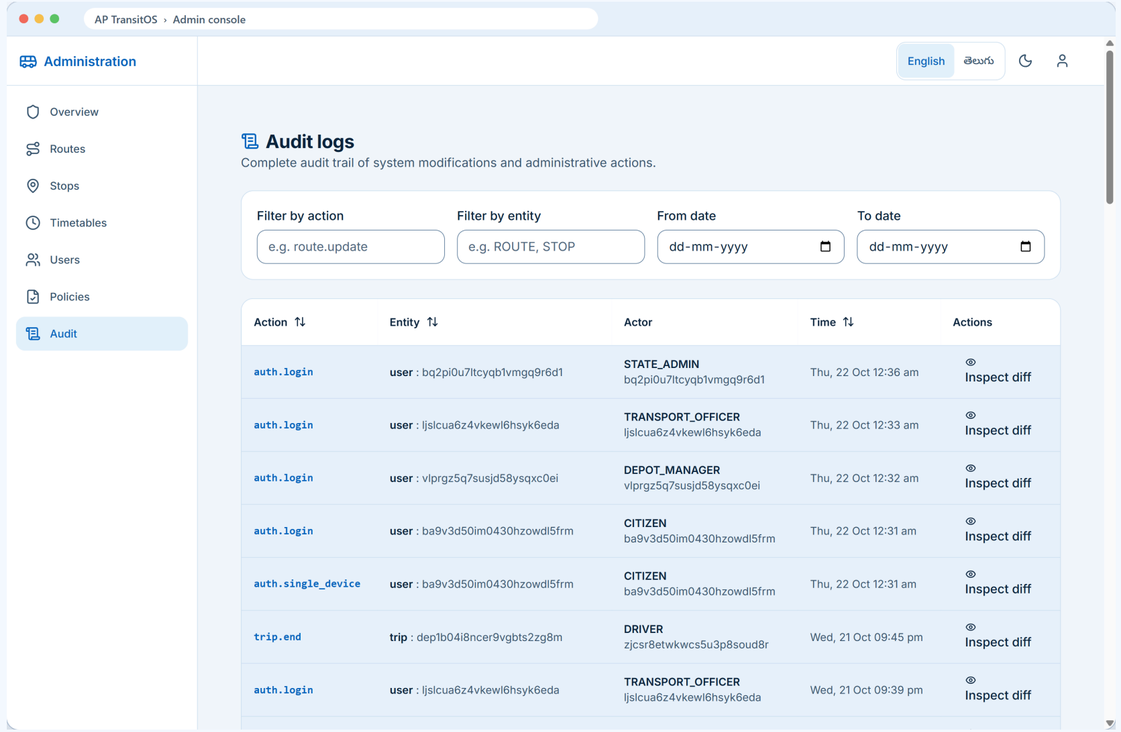

ADMIN CONSOLE

Routes, users and a full audit trail

Routes

Every route and its stops, in order.

Audit log

Every sensitive action is recorded with who and when.

SECTION 3 TO 6

What it gives APSRTC

Benefits for every user, cashless operation, passes that keep riders, and data for every decision.

BENEFITS

Everyone in the chain gains something

Who	What changes for them
Citizens	Book from home, no change needed, see the bus live, passes on the phone, alerts in Telugu
Conductors	Scan instead of tearing tickets, no cash bag, no shift end cash count
Drivers	Today’s duty on one screen, one tap SOS and breakdown report with location
Depots	Every bus and incident live, replace a broken bus in minutes, crew roster in one place
APSRTC HQ	Revenue on record per ticket, prepaid pass income, new ad income, fewer leaks
Government	Live state view, verified free travel counts, evidence for where to add buses

CASHLESS, PAPERLESS, LESS HARD WORK

A conductor’s shift, before and after

Today

- Collect cash, find change for every rider
- Print or tear a ticket per passenger
- Count free travel riders by hand
- Count and deposit cash after the shift
- Depot reconciles cash against tickets

With AP TransitOS

- Rider pays by UPI before boarding
- One scan: VALID in under 2 seconds
- Free travel ticket at zero fare, counted
- No cash bag, nothing to count
- Every rupee already matched to a ticket

Cash still works for those who need it during the change. The goal is that most riders never need it. The QR code changes every 3 seconds, so a screenshot cannot be reused, and a family ticket boards everyone with one scan.

PASSES KEEP RIDERS

Weekly and monthly passes turn riders into regulars

1
Buy once
Daily, weekly, monthly, zone, family and school passes

→

2
Ride daily
Scan and go, no ticket each time

→

3
Reminder
Alert before the pass runs out

→

4
Renew in two taps
And the cycle starts again

Money up front. A month of fares arrives on day one, before the rides.

Riders stay. A commuter with a pass takes the bus, not a shared auto.

Demand is known. Pass routes show who travels where, every day.

Pass prices in the demo are placeholders; APSRTC sets the real ones in the admin console.

DATA

Every ride becomes a record APSRTC can use

Demand by stop and hour

Add buses where riders wait, cut empty runs

Delay peaks

Which routes run late, and at what hour

Free travel counts

Stree Shakti rides by district, verified by scan

Fleet use

Kilometres, trips and idle buses per depot

Complaints

Time to close, by depot and by type

Reports in one click

Daily, weekly and monthly CSV for Excel

Stree Shakti: the state pays APSRTC about ₹160 crore a month. Scan based counts give both sides one trusted number.

Source: Stree Shakti monthly payment, PTI, October 2026 · 25

SECTION 7

New money

Advertising inside the app, and the much larger value of revenue that is tracked instead of handled in cash.

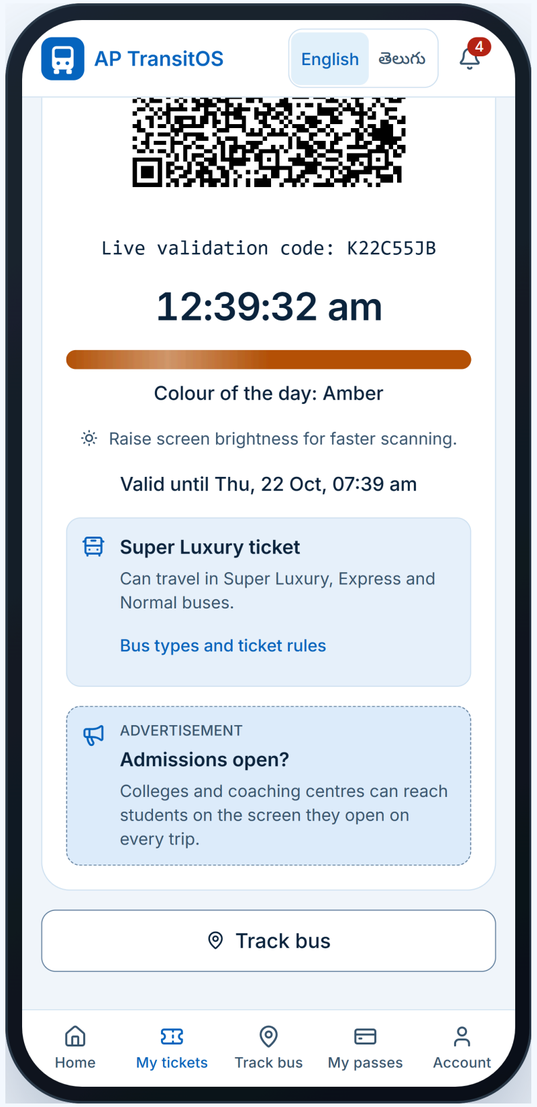

ADVERTISING

Ads where riders already look

Every ticket and pass is opened at booking, before boarding and at the scan. A labelled ad sits under the QR code and never covers it.

- **Ad under ticket and pass QR**: built and live in the pilot
- **Sponsored stops and places**: local shops, colleges and malls near a stop (planned)
- **Proof of audience**: real view counts by stop and hour make APSRTC's bus and stand ads worth more
- **Sell directly**: Kerala KSRTC doubled ad income to about ₹12 Cr a year by dropping middlemen

Open decisions for APSRTC: who sells ads, pricing, and whether free travel riders see ads.

Source: Onmanorama, March 2024 · 26

ADVERTISING: THE NUMBERS

₹2 to 36 crore a year of new ad income

Assumption	Conservative	Base	Strong
Riders using the app, of 40 lakh a day	10% (4 lakh)	25% (10 lakh)	50% (20 lakh)
Ad views per rider per day	2	3	3
Price per 1,000 views (local, targeted)	₹50	₹80	₹100
Ads under ticket and pass QR, per year	**₹1.5 Cr**	**₹8.8 Cr**	**₹21.9 Cr**
Sponsored stops and places (planned)	300 × ₹2,000/mo	1,000 × ₹3,000/mo	3,000 × ₹4,000/mo
Sponsored listings, per year	**₹0.7 Cr**	**₹3.6 Cr**	**₹14.4 Cr**
Total new ad income per year	**₹2.2 Cr**	**₹12.4 Cr**	**₹36.3 Cr**

For scale: Kerala KSRTC earns about ₹12 Cr a year from ads; MSRTC earns ₹22 to 24 Cr. This income is **on top of** APSRTC's existing bus body and bus stand ads.

All rows are estimates to validate in the pilot. Peers: Onmanorama (2024), The Week (2025) · 27

THE BIGGER MONEY

Small percentages of a big network add up fast

₹53 Cr

a year for every 1% of fare revenue moved from cash to tracked digital tickets

₹19 Cr

a year for every 1% of the Stree Shakti claim backed by scan records

Day 1

when pass money arrives: a month of fares before the first ride

Based on ₹14.46 Cr earned a day (about ₹5,280 Cr a year) and about ₹160 Cr a month paid for Stree Shakti (about ₹1,920 Cr a year). These are sensitivities, not promises: the pilot measures the real figures.

Sources: APSRTC daily earnings (March 2025); Stree Shakti payment, PTI, October 2026 · 28

MONEY IN ONE VIEW

Where the value comes from

Source of value	How it is measured	Size (per year)
Fare revenue on record	Each 1% moved from cash to digital	about ₹53 Cr per 1%
Verified free travel claim	Each 1% of Stree Shakti backed by scans	about ₹19 Cr per 1%
New in-app advertising	Ads under QR plus sponsored stops	₹2.2 to 36.3 Cr
Prepaid pass income	Weekly and monthly passes paid up front	cash flow, set by pass prices
Less cash handling work	No change, no paper, no shift end counting	staff time saved every shift

Not counted here: fewer empty runs from demand data, faster bus replacement after breakdowns, and better ratings from citizens.

SECTION 8

Scale and rollout

Built for Andhra Pradesh, ready for metro cities and other states.

SCALE

Built for one state, ready for many

Operator	Buses	Riders a day
APSRTC	**11,495**	**35 to 48 lakh**
TGSRTC, Telangana	10,000+	about 60 lakh*
BMTC, Bengaluru	6,955+	about 48 lakh
MSRTC, Maharashtra	about 12,600	not verified
KSRTC, Karnataka	about 8,000	about 30 lakh

Many states built in. The data model is State, District, Depot, Route. A Telangana data set already runs on it.

Metro city mode works today. Kurnool city lines run seatless local tickets, zone passes and frequent buses: the same needs as Bengaluru or Hyderabad.

New language, not new code. Every word is a translation key: Kannada, Tamil or Marathi is one new file.

Same ad and data model. More riders means more ad views and better data, at almost no extra cost per rider.

Sources: Wikipedia (APSRTC, BMTC); Free Press Journal (MSRTC); Deccan Herald (KSRTC). *TGSRTC figure unofficial

ROLLOUT

Start small in Kurnool, prove it, then grow

STEP 1

Kurnool pilot

One depot, city lines and intercity. Measure app use, scan time, ad views and cash share.

STEP 2

Region

More depots and districts. First advertisers and sponsored stops.

STEP 3

All of AP

Every depot, every bus. Stree Shakti counts live for the state.

STEP 4

Beyond AP

Offer the platform to metro city operators and other state corporations.

What we ask for: one depot, its crews and buses, and [__ months] to run the pilot with real riders. The pilot replaces every estimate in this document with a measured number.

Not just another bus booking app.

One connected platform that brings citizens, buses, transport staff and government together.

Cashless
every rupee on record

Live
every bus on the map

Loyal
passes that renew

Ready
to scale beyond AP

APPENDIX

Sources and assumptions

Sources

- APSRTC fleet, riders, earnings: Wikipedia (March 2025); APSRTC At a Glance
- Stree Shakti: PTI and Deccan Chronicle, October 2026
- KSRTC Kerala ad income: Onmanorama, March 2024
- MSRTC ad income and fleet: The Week (April 2025); Free Press Journal
- BMTC fleet and riders: Wikipedia; Deccan Herald
- TGSRTC: unofficial listing, to be checked

Assumptions to test in the pilot

- 40 lakh riders a day used as the base for ad maths
- App adoption 10%, 25% or 50%; 2 to 3 ad views per rider a day
- ₹50 to ₹100 per 1,000 local targeted views
- 300 to 3,000 sponsored listings at ₹2,000 to ₹4,000 a month
- Leakage is shown as a per 1% sensitivity, not a claimed rate
- Pass prices and senior fare share in the demo are placeholders
